What do you need to do?

If you experience any issues, please contact the IT Service Desk at extension 24357.

INFORMATIONAL

Due to a recent possible prion exposure of Creutzfeldt-Jakob disease (CJD), changes have been made to the order set. The current CJD Panel order will test for the following in a CSF Sample:

- 14-3-3 protein
- Tau
- RT-QuIC (Real Time Quaking Induced Conversion)

Although the order indicates only 14-3-3 will be tested, all 3 tests mentioned above are performed.

The lab will send the CJD panel to ARUP. ARUP sends CJD panel to Case Western's National Prion Disease Pathology Surveillance Center. Neuron-Specific Enolase (NSE) is no longer part of the CJD Panel. The Mayo Clinic now only performs Neuron Specific Enolase for CJD.
